Almost a Hero v5.4.1 Mod Apk Almost A Hero is an RPG clicker game where 9 of the most useless idiots embark on a quest to be slightly less useless idiots. They say never give a loser an even chance. We say different. Nine deeply unique and deeply flawed individuals have been chosen for greatness. Heroic, noble, enlightened... Just 3 of the many words they can't spell. They will set off on an epic journey that will turn them from zeroes to almost heroes. Or dead people. More likely the latter. Join these 9 zeroes on a quest to become heroes in an ancient land. Train them to learn battle skills, magical powers and which end of a sword is the business end. In AaH you'll find quests, secrets to unlock and there's lots of clicking to do. Yup, it's a clicker game. Have nearly got what it takes to become almost a hero? Almost a Hero - Idle RPG: If you mention the heroic image then surely no one Imagine fools. Heroes must have superior qualities than ordinary people such as intelligence, agility, and health. Thanks to these bright characteristics they will be able to fight monsters easily and win. But for some game makers, the heroic image is too boring, and they want to bring a new motif to the player. For Bee Square Games producers, "Almost Heroes" does not have to be very good, they are a bit silly. But importantly, these people can save the world from the dangers that are threatening. Almost a Hero - Idle RPG is a well-known product in the mobile gaming community as it combines two of the most popular elements. Idle RPG is a blend of RPG's appealing and dramatic gameplay but does not require a lot of investment time thanks to the Idle mechanism. With over 1 million downloads on Google Play, it has proven to be successful in combining these two almost unrelated games. When you join the game, you will be allowed to play a team of criminals on the journey against the dark forces. They are not the cruellest and most cunning criminals, but the 15 most useless and mean. But fate has made the "almost heroes" to engage in this dangerous adventure. These people can create wonders, from zeroes to heroes or become dead people. You will decide everything in this exciting and fun battle. The setting will take place in an ancient land, where legendary things will happen before the player. All the idiots in your squad will have to be rigorously trained to learn how to hold a battle, work closely together and even learn magic. The battle will take place in a vertical screen with two sides divided. Each side will be accompanied by 5 "heroes" and will be able to fight immediately when both sides face each other. At this point, the RPG factor is revealed when the player can freely control his character training skills to attack the enemy. Throughout the game, these characters are automatically activated and can be upgraded while the game is in progress (the rings system: 3 thunder, fire, ice). In addition, after the battle, chests, goblets, can also be purchased to upgrade power, along with other equipment such as wearing armor, gloves, hats, glasses. The higher the level, the more levels you can unlock and different levels. These idiots, at some point, will become "almost heroes."
